Since we started the **Benelux LightWave Resource** website over **900** users have registered and downloaded various files. To keep the Resource growing we very much welcome new high quality documents (objects/scenes/textures/etc..).**If you have some great objects lying around and collecting dust, why not share with the LightWave community ?**Once you've registered you get an upload function in the dropdown extra-menu. Below is a video guiding you thru the process. **Thanks for supporting the LightWave Community.**
