LWCAD 4 Contest

2011/12/6 21:53 - admin

Here's your chance to win a copy of the brand new LWCAD 4for Newtek's LightWave3D

WToold3D's new LWCAD 4 offers a huge advantage in Architectural modeling and here's your chance to win a full copy!The Benelux Lightwave Resource and Liberty3D in association with WToold3D are proud to be able to offer this opportunity to the LightWave community. So let's cut to the chase, here's what you got to do:Model an architectural structure from scratch If you have the means, show us the steps you have taken Tell us why LWCAD 4 would have made a difference in modeling the object Upload the model, a rendered image and optionally the steps you have taken in the contest submission form before **January 31, 2012** Wait There are some rules you need to take in account:You have to model the architectural structure from scratch You may surface and texture it so you can provide us with a glossy render The motivation weighs hard in the final result also. Model 60%, motivation 40% Do not just model four walls, a ceiling and a floor, dress it up We need a minimum of fifteen contestants You need to be a registered user of the Benelux Lightwave Resource website (free). Not a very practical solution, but it is the best way to avoid unwanted *gambling* using blue *pills* with lots of *naked* women and men *adverts* in our mailboxes. **The winner will be chosen by LWCAD 4 creator Viktor Velicko (WToold3D)**We are awaiting your entries using this form.**The contest is closed**

When you want to provide us with the steps you have taken, add them to a ZIP file together with your object and use the form OBJECT submission field. **p.s. you won't see the submission form if you are not a registered user.**

 Have fun and good luck!
